
Subject: /fill, or /cell_fill, with /satellite projection

Has anyone got any ideas how I can do filled contour plots on surfaces created using the "map_set" command, "/satellite" option.

I am trying to project a contour plot onto the Earth's surface, viewed from a particular angle in space.

If I use /fill, or polycontour, only some of the contours get filled.

If I use /cell_fill, all the contours are filled, but so is the bottom left hand corner of the plot window. Aaargghh.

Apologies if this has come up before.

Cheers,

Martin
