I have some routines reading/writing Analyse 7.5 format, not well tested.

Let me know offlist if you are interested.

Hi Kartens,

Thank you, but as far as i know the 7.5 format is the *.img *.hdr
system, or maybe i'm wrong?

However, I had a look at an AVW file and it seems to just be a 4095
byte text header with text tags in it.

Cheers

Soren
