Hi everyone,

I'm looking to create a 2 dimensional array from 3 1 dimensional arrays:

e.g.

```
Arr1  Arr2  Arr3
-200000 -200000 2
-200000 -195000 0
-200000 -190000 3
```

...

```
-195000 -200000 5
-195000 -195000 7
-195000 -190000 8
```

etc.

so that the output is thus:

```
      -200000 -195000 -190000
-200000    2      5
-195000    0      7
-190000    3      8
```

Can anyone help me at all? I can't use GRIDDATA as I have IDL 5.5 student edition. Thank you!

all the best,
Martin
