Joel Gales has implemented HISTOGRAM
including REVERSE_INDICES for GDL:

http://sourceforge.net/projects/gnudatalanguage

the relevant code if in src/gsl_fun.cpp
Of course this is within the GDL framework but
maybe it helps you to get the idea.

Cheers,
marc

In idl it would be

y=findgen(100)
n=n_elements(y)
idx=max(y)-indgen(n)
reverse=y[idx]

cheers
