I guess you have probably tried the LEGO keyword on a SURFACE command, huh?

Cheers.

David

How is your data structured? If you only had x/y data points (i.e. a vector of x values and a vector of y values), hist\_2d should do exactly what you want. So, why does hist\_2d not do what you want it to?

Very humble apologies. I now can't even remember why/how I thought hist\_2d didn't work. It can only have been incompetence; that and the fact it was my birthday. (Old age/senility etc)

Cheers, Tim
