
Subject: ? Plot velocity field in distorted mesh ?

Hi, there,

I need to plot a velocity field in a non-uniform mesh (with nx, ny dimensions).

I tried

VEL, U, V

It plots the velocity vector in a uniform mesh.

I then used

VELOVECT, U, V, X, Y

Again, it plots the rectangular mesh.

Are there any ways that I can plot the velocity field with arrows located at the exact (x, y) positions?

Thanks in advance.

John Z. Ding.
