Hello All,

Woof! I have just about worn a hole in my head from all this head scratching so any guidance will be very much welcome.

Is it possible to format an integer using the format specifiers such place separators are used? For example...

1234 becomes 1,234

1234567 becomes 1,234,567

123456789 becomes 123,456,789

Thanks!  
Ben

Dude, we have the same name. I'm Benjamin Nathan Cardozo Tupper of Chicago. Are we related? You can email me at (i will break it up so as not to get caught by spiders) lockerm<break>aster@gmail.com. That's lockerm<break>aster at gmail.com. Just take out the "<break>".
