Heloo all!

I read in one of the 2004's emails about:

> Liam Gumley has written some code for correctly displaying MODIS image

> data, try <<ftp://origin.ssec.wisc.edu/pub/MODIS/IDL/>>.

The code is not there anymore. Where can I find it?

I am trying to correct some MODIS images operationally. This code can help me a lot, I think.

Thank you,

Oana Nicola
