
Subject: group leader for iTools

Hi all,

is there a way to specify a group leader for iTools? I want to pop up an iTools from my widget application, and it would be nice if the iTools was killed when the main app closes.

I tried to pass the group_leader keyword to the iTool call. There is no error message, because the iTools code accepts _extra keywords, but it doesn't work.

Any other ideas?

Thanks,
Benjamin
