Hey, I am calling a c routine from IDL and I get the following error:

```
CALL_EXTERNAL: Error loading sharable executable.  
Symbol: reflect, File = /Users/dmg31/jup/SIMUL/simul.so  
dlsym(0x10f7c0, reflect): symbol not found
```

reflect is a function in the C code. I am guessing it is a compiling error. I am having trouble with this because this program worked when it was running on a Sun OS but now I am running on mac OS X and I have trouble using call external. My code to compile the C routine is as follows:

```
ld simul2.o -flat_namespace -lbundle1.o -undefined suppress -lm -o  
simul.so
```

if anyone could help me out that would be great!

thanks
dan
