and also when i print to the screen using

DEVICE, SET_FONT='Times', /TT_FONT

xyouts..etc

it looks pretty blocky - an idea how to render the text to the screen
better?

thanks

russ

There's not much detail in your post, but take a look at the
bits_per_pixel keyword (for DEVICE) and make sure you use the right
coordinates (data or normalized, but not device coordinates).

Benjamin

I don't see any xyouts

but if it is in the order at last then it is on top.

cheers
