Hi all

I am writing code in IDL and also some routines in C(vc++ 2005 express). I have some problems while debugging C routines. its giving me the following errors

Error loading sharable executable

Symbol: IDL_Load, File = C:\Documents and Settings\Rajiv\My Documents\image plate software\temp\p3d.dll

The specified procedure could not be found.

I ve given the correct address in the IDL_DLM_PATH. but still this problem persists.

could some one help?

_rajiv
