HI~ ALL ^^

I want to plot a graph which include another graph.
Actually, I want to plot a samll part of main graph on
the marginal region. The small one is just enlarged
version of the some part of main graph.

like this~

```
-----  
-               ----- -  
-               y - - - -  
y -             - - - -  
-               ----- -  
-               x      -  
-               -  
-----  
                x
```

Is there any procedure doing this job?

Otherwise, How do I approach it?

Thank you~^^

Best Wishes, ***
