Hello, I have an easy question. I have two arrays:

help, array1

help, array2

```
ARRAY1  STRING  = Array[15, 4]
```

```
ARRAY2  STRING  = Array[15, 6]
```

I need to merge these two arrays into 1. I'm using:

```
Array3 = [array1, array2]
```

But it doesn't work, since the dimensions do not agree. How can I do to concatenate these two arrays? How can I fill with zero values the array1 to match it with array2??

Thanks!
