Subject: Displaying equations in ps output Posted by vorticitywolfe on Wed, 01 Mar 2006 20:52:35 GMT View Forum Message <> Reply to Message

Hello,

In regards to the post by from:

greg ushomirskiy "typesetting math in IDL plots" Date: Fri, Oct 3 1997 12:00 am

He was asking about displaying equations in ps output. The links from the responses are now dead, but I was wondering has there been anything new that has come along to do this? I know of TeXtoIDL, but that gets rather complicated if you want to put in some partial derivatives and "mean bars". Any information would be helpful. Thanks for the help!

Jon

For curiosity, then how to add a bar or dot to a symbol like \dot{M} in Latex?
