It is possible to use dot(.) and field names.

```
IDL> print, apdata.AP_DATA_INDEX
```

```
IDL> print, apdata.L4_AP_300_NM
```

```
....
```

You can access field values with numbers.

```
IDL> print, apdata.(0)
```

```
IDL> print, apdata.(1)
```

```
.....
```
