Hello,

I am trying to plot a 3-d surface array to a 2-d array.

I have X,Y,Z values and I want to make a graph with X,Y and Z as a different color depending on the range of values. For example if  $90 < Z < 100$  then to have a blue color in the x,y range and so on depending on the Z value. Does anyone know a quick way to do this?

Thank you in advance!

JJM
