Hello,

I am trying to install the PAN utility from

<http://www.ncnr.nist.gov/staff/dimeo/panweb/pan.html>

I copied and unpacked the source code in my laptop that runs SUSE 9.3 in the directory `:/usr/local/rsi/idl_6.0se/`

but when I tried to start the program I get:

```
IDL> pan
```

```
% Attempt to call undefined procedure/function: 'PAN'.
```

```
% Execution halted at: $MAIN$
```

so I think there is something wrong in the installation. I was wondering if anyone has installed this program successfully. The above webpage instructs to make sure that the new folders created on your computer are in your IDL path, but I am not sure where exactly I should unpack the program.

Any suggestions?

Nolan
