It has been a while since I have managed a unix license server but...

Is lmgrd running?

`ps -ef|grep lmgrd`

if not, have you looked at the provided lmgrd startup script? Does it seem to be pointing to the correct binaries?

What are the SERVER and DAEMON lines in your license file? Do they look correct?

```
SERVER my.license.server.gov serverMACaddress server_port  
DAEMON daemon_binary_name /some/path/to/daemon_binary PORT=daemon_port
```

can you resolve the server name? (in my example: my.license.server.gov)?

do you have a firewall that could be blocking access to your server and daemon ports?

is the daemon binary listed correctly and is the path to the executable correct?

Have you looked "for further information" at the given URL listed in the error?
