Obviously I'm unable to execute compound statements:

When I write the following loop:

```
for i=1L, 4 do begin  
  help, i
```

I get

```
I   LONG =    5
```

and it looks as if begin is immediately followed by end:

IDL. Version 3.6.1b (windows 3.1).

IDL> repeat begin

All rights reserved. Unauthorized reproduction prohibited.

& END

^

% Syntax error.

Any clue ?
