
Subject: negation operator

This is odd...

```
IDL> print,-100 > -90 < 90
```

```
print,-100 > -90 < 90
```

```
      ^
```

Syntax error.

```
IDL> print,-100 > (-90) < 90
```

```
      -90
```

Is there any reason why a negation operator should ever come lower than anything else?

Greg
