## Subject: Re: OUPUT TRIGRID to ENVI

Posted by Ulan on Thu, 27 Jul 2006 07:37:21 GMT

Hi Derek,

First, you don't have to read and write image files in order to import
and export from ENVI to IDL - there is a menu button (File->Import from
IDL variable and FIle->Export to IDL variable). Or else, if you have
to, then try in IDL after the trigrid:

be_grid=ROTATE(be_grid,7)

Hope this helps,
Ulan

## Subject: Re: OUPUT TRIGRID to ENVI

Thanks Ulan.  Rotate worked great.  I also was not aware of the ENVI functionality you described.
