Hi All,

I've recently purchased David Fanning's 2nd edition of "IDL Programming Techniques" and am trying to download the accompanying files from the website, to no avail. The anonymous ftp times out and the zip file link shows a "page cannot be displayed". A "save target as" has also been tried but this "operation has timed out".

I was wondering if anyone had these files downloaded already and posted in another webiste?

I'd like to jump into this book I've heard/read so much about, but doing so without these files is a bit disappointing.

Thanks in advance,
Nikki

Hi all again,

Just a follow up, Thank you again to Benjamin who sent me the files yesterday.

Nikki
