I'm now reading .xls files natively in IDL using IDL's COM import bridge and the Microsoft Office 2003, Excel Application Object. I *may* be able to preview it if anyone wants to "alpha" test it. Is there a project anyone is working on that could benefit from such functionality?? Contact me directly for more info: psom...@ittvis.com

Thanks for all the great feedback. Solutions (Excel, Word and Spreadsheet) now posted on ITT Code Contrib:

<http://www.ittvis.com/codebank/search.asp?FID=445>

Please let me know if you make improvements, etc.

Thanks,
Paul
