Subject: Output log contents to be displayed

Posted by hyperjiver on Thu, 17 Aug 2006 19:49:47 GMT

Hi,

I am running a runtime application and this application does not require any user inputs. So I do not know what's happening. Is there anyway that I could get the contents that would print on the output log window (when existing) on some box and not require any user input but just to see whats happening.

Thanks for your time,
HJ
