Yeah, the Interface Definition Language people don't know squat about IDL. :-)

You are going to have to obtain the *value* of the variable, as you realize. To do that, you are going to have to learn about SCOPE_VARFETCH and SCOPE_VARNAME. Here is an article that might help:

http://www.dfanning.com/tips/access_main_vars.html

Cheers,

David

Thanks for the tip. Works just the way I want it to.
