Subject: Redraw an image in IDL object

I have a simple question to ask. I'm using IDL objects to draw graphics. I want to display two 3D images sequentially. However, when I update the new data, IDL won't update the view. Here is what I did:

```
myvolume = OBJ_NEW('IDlgrVolume', newdata)
```

```
mymodel -> Add, myvolume
```

```
mywindow -> Draw, myview
```

Can anybody tell me what is wrong with my code? Thank you very much for your time!
