Folks,

Getting ready for an IDL class, I just noticed MPFIT (indeed ALL of the programs on Craig's web page!!) have been made ready for the 21st century with square bracket subscripting. Oh, my goodness. Be still my heart! :-)

Cheers,

David

P.S. Let's just say this may not be comparable to the Holy See's pardon of Galleo, but it is at least as unexpected. :-)

[I've been away on travel, so I didn't see this message.]

I'm glad to see that David's heart is still intact. I still work and think in IDL4 syntax, but did the conversion to square bracket notation "for the people." :-)

Craig

And no, not everything on my web page is converted yet. There must still be some renaissance dissidents that need to be pardoned first.
