Subject: Opening a .isv file Posted by K. Bowman on Fri, 13 Oct 2006 15:09:20 GMT View Forum Message <> Reply to Message

The ability to save the iTools state in a .isv file is extremely useful.

To open a .isv file, however, one must start an iTool, then use the File...Open menu item interactively to navigate to the .isv file to open it.

Is there a simple command-line way to do this, such as

isv_open, filename

where filename is the path to the file?
