Folks,

Is anyone aware of a problem with reading CDF files on a Mac in IDL 6.3? Someone wrote to me saying he can open the files on his PC, but not on his Mac. He gets an error saying that the CDF file is corrupted or not supported in the current version of IDL.

Thanks,

David

Nasa just released a new patch for CDF. Without it, I was getting the same errors. I am not using IDL 6.3, though.
