Dear Ben,

According to the IDL documentation of WIDGET_CONTROL, the syntax
USE_TABLE_SELECT=[left,top,right,bottom] is valid (see example for changing
the column widths).

Aside from that, the USE_TABLE_SELECT/SET_TABLE_SELECT combination results
in the same error message.

Regards,
Harald

Hi,

The USE_TABLE_SELECT keyword is logical (0/1). Do you really want ...

```
WIDGET_CONTROL, myID, /USE_TABLE_SELECT, SET_TABLE_SELECT = [4,0,9,9],
FORMAT = '(F15.3)'
```

instead?
