Hello. I am a beginner and I am having trouble with a loop. It's like this:

```
j=0
for i=0,20 do begin
  if (data.field08[i]='V') then begin
    dataV.time[j]=data.field10[i]
    dataV.object[j]=data.field07[i]
    dataV.count[j]=data.field09[i]
    dataV.filter[j]=data.field08[i]
  endif
  j++
endfor
```

If I delete `j++`, it works fine writing all to the 0.th. but I need `j` to increase each time. so I add `j++` and receive an error message like this:

" Subscript range values of the form low:high must be ≥ 0 , < size, with low \leq high: <No name>"

How can I fix that? I will be thankful if you help me out with this.
Good day.
