---

I have a sequence of plots which i want to convert to an mpg video

However, the quality of the mpg created is very bad in comparison to my plots.

How can i increase resolution??

So far i only managed to change the x and y size of my picture.

I use the following code:

```
nfr=frames  
xsize=1000  
ysize=1000  
mpegID=MPEG_OPEN([xsize,ysize])  
.....  
(here i do the plotting)  
.....  
mpeg_put,mpegID,WINDOW=0,FRAME=it-1,order=1  
endfor  
MPEG_SAVE,mpegID,FILENAME='movie.mpg'  
MPEG_CLOSE,mpegID
```

Thanx in advance!!
