What have you tried already? :-)

TV, [[[b1]],[[b2]], [[b3]]], True=3

Should do it, where b1-b3 are your arbitrary
bands:

b1 = BytScl(data[*,* ,arbitrary_band]*arbitrary_scale_factor)

Cheers,

David

Thank you David Fanning!

I try to preprocess the hyperion data with IDL recently.So, I hope to
communicate with anyone major in this field.

Sorry, I'm an English major. :-(

Cheers,

David
