Well I hope they aren't abandoning you (or anyone else for that matter). Migrating from IDL would force me into making choice between RNum, Narray, NumPy, Numeric or any of the other free array processing extensions. I wouldn't want to back the wrong horse!

Robbie

Haje et al,

Now that you mention it, they weren't there, I didn't notice it at the time but in hindsight. Any ITTVIS folks on the list to comment on this "abandonment"?

Cheers,

Brian
