Subject: minimum curvature gridder in IDL?
Posted by joe on Mon, 15 Jun 1992 06:05:42 GMT

G'day,

Before I re-invent the wheel yet again, I though it would be wise to ask.

Does anyone have a good gridding algorithm, such as Brigg's minimum curvature,
coded up and running in IDL?

Looking forward to many helpful replies   :)

Cheers,

Joe
