Subject: Moving 3D Axis
Posted by hdgarner on Tue, 24 Jan 1995 19:13:40 GMT

I would like to be able to move the 3D axis so that it appears in the center
of a 3D plot of a FFT done with the SURFACE procedure. I have tried several
things including the AXIS procedure and the T3D procedure with little success.
If anyone could help me with this problem I would appreciate it.

Thanks.
