I am looking for feedback regarding the Wavelet Toolkit. Is it difficult to use? Is there sufficient documentation to get started? I don't need documentation on the mathematical concepts of wavelet analysis itself.

I have a few years of experience with IDL as a graduate student.

I suppose the more pertinent question is, has anyone found the Wavelet Toolkit to be useful for wavelet analysis? Or should I save my money and rather invest my time in programming my own wavelet routines?

I've used it for Continuous Wavelet Analysis with the Morlet Wavelet, i.e. the function:
wave = WV_CWT(data, 'Morlet', 6, /PAD, SCALE=scales)
and it performs well.

Cheers,
bob
