I don't know what I'm doing wrong that I can't make my ion scripts work. I installed apache 2.2 in my PC to make a localserver.. I did everything the wizard said to configure ION PATH and IDL PATH. The localhost is working, but ion scripts are not. I type:

>>> `http://localhost/cgi-bin/ion-p?page=mypage.ion`

and it says that:

>>> The requested URL /cgi-bin/ion-p was not found on this server.

Do I need a special license for ION?

thank you
