Subject: "True" map projections

Posted by afl on Sat, 28 Jan 1995 00:19:27 GMT

I received a nice reply on this topic from a user
I can't identify because I deleted her/his email message.
Suffice it to say this user from the UK is more enlightened
than I--> "Use the /ISO keyword in your map_set call."

Is the ISO keyword a documented feature in IDL?

"No comment."
