Subject: how to suppress tick labels on x-y plot Posted by teich on Fri, 18 May 2007 16:39:11 GMT

Hi,

I have a plot and the x and y axes are labeled at 0,1,2, etc. I want to keep all, but not have the 0 labeled.

Does anyone know how I can suppress the '0' label on my x and y axes?

Thanks,

Howie
