
Subject: error in reading unformatted fortran files

I've been having a problem when using idl to read unformatted fortran files. I get the

error:

```
% READU: Corrupted f77 unformatted file detected. Unit: 1  
File: ../models/mod_sphere/tarr2.unf
```

When I searched on google, I found that there had been some discussion of this problem in your group earlier about a year ago. (I'm cci'ng in particular Mark as I see he had this problem) I was wondering if you've found how to deal with it? If so, I'd appreciate any advice you have on this,

Thanks,
Sukanya
