Subject: Iplot x labeling Posted by jochem.verelst@gmail. on Fri, 01 Jun 2007 22:13:55 GMT View Forum Message <> Reply to Message

Hi IDL gurus,

A simple question which is providing me headache.

I have, say, x=[-6,-4,1,5,7] and y=[5,4,3,4,5]

now I wish to plot x and y in IPLOT in such a way that on the x-axis only the x values are shown. Without any additional ticks. Hereby, the outer values should not be at the very end of the plot, but rather a bit inside.

Somebody can help me out?

greetzz, Joe
