I can't say when last it worked, other than it has worked prior to
yesterdays massive (200+ package) update. Don't ask why I did 200+ all
at once, it's too long a story.

It appears as if anything (or most anything, I'm not sure which) that
calls widget_control fails with the "Array dimensions" error.

Any hints? (downgrading all 200+ packages isn't really an option :-(

TIA,
Bruce

PS - Amazing how pre-cognizant my random signature generator is :-)
