Hi

may be someone knows, if there is an xmlrpc functionality implemented into the idl codebase? Or does one have a dlm for that too?

cheers
Reimar

I have written a client implementation for XML-RPC (not as a DLM). I could speed it up significantly by taking advantage of new features of IDLffXMLSAX in IDL 6.4. A server implementation is a little harder because I would have to write a http servlet.

<http://www.barnett.id.au/idl>

Hi Robbie

client is all I want and need. Because I want to use it with MoinMoin
(<http://moinmo.in>) wiki xmlrpc.

cheers

Hi Robbie

in python I could setup the url like that example#

```
wikiurl = "http://localhost:8080"  
homewiki = xmlrpclib.ServerProxy(wikiurl + "?action=xmlrpc2",  
allow_none=True)
```

In your lib call I dont see currently how to enter "?action=xmlrpc2"

why not defining the params similiar to pythons xmlrpclib.ServerProxy?

cheers
Reimar
