S = strjoin(replicate('a', 1024), /single)

Replace 'a' with ' ', but this is somewhat easier to debug.

Maarten

blankString = String(Replicate(32B, 1024))

Cheers,

David

```

or similiar

```
a=systime(1)&txt=string(bytarr(1024,1)+32b)&print,sy stime(1)-a
```

cheers
Reimar

For understandability, I like David's answer.

For hack value, this is the best I could do:

```
a='&for j=0,9 do a=a+a
```
