Hey again,

for english version of the linked page use:

<http://www.doering-thomas.de/page.php?seite=1&sub=6&lang=en>

Greets again.

I think that this very annoying problem is crying out for a combined effort to solve it.

I see two directions:

1.
Have a project which is centered around the architecture of the standard library and Boost
(<http://www.language-binding.net/pyplusplus/pyplusplus.html>)
2.
Have a project which is more generic and centered on the C interface.
(<http://www.swig.org/>)

I only have a very vague understanding of either project. However, both use GCC-XML.
