Subject: 3-d (stacked) vector plotting

Hello,

I've been using velovect to make some vector plots.
But, I have a vertical column of horizontal winds
which I'd like to stack vertically and make a plot
of over time.

So, one column would look something like what you
see in an oceanography textbook illustrating
an Eckman spiral, if you're familiar with that...

thanks for the help,

Mike
