I take it the obvious solution of drawing the larger circle
in the disk color and the smaller circle in the background
color doesn't appeal to you, for some reason?

Cheers,

David

Well, I actually wanted to overlay this disk with hole on top of another graph. I solved it by drawing several empty circles right within each other, but this is definitely not the most elegant solution.
greetzzz, Jochem

Elegant!? Try MatLab. :-)

Cheers,

David
