Harmonic Software has released "IPT - The Image Processing Toolbox for O-Matrix". IPT provides a comprehensive set of functions for image manipulation and analysis. The IPT capabilities include image file I/O, color space transformations, linear filtering, image transformations, mathematical morphology, image enhancement, and image analysis.

IPT is multi-threaded, uses SIMD technology, and is built with leading-edge image processing algorithms to provide execution performance and efficiency that far exceeds other toolbox and stand-alone image processing solutions.

View the IPT benchmarks and performance details at:
<http://www.omatrix.com/iptbench.html>

IPT is priced at only \$200 for commercial users, with discounts available for academic and government agency customers.

The Image Processing Toolbox enables the development of analysis and turnkey solutions in a broad range of industries including:

- Medical Imaging
- Microscopy
- Industrial Inspection and Measurement
- Surveillance
- Biometrics
